
#TeamG3D.

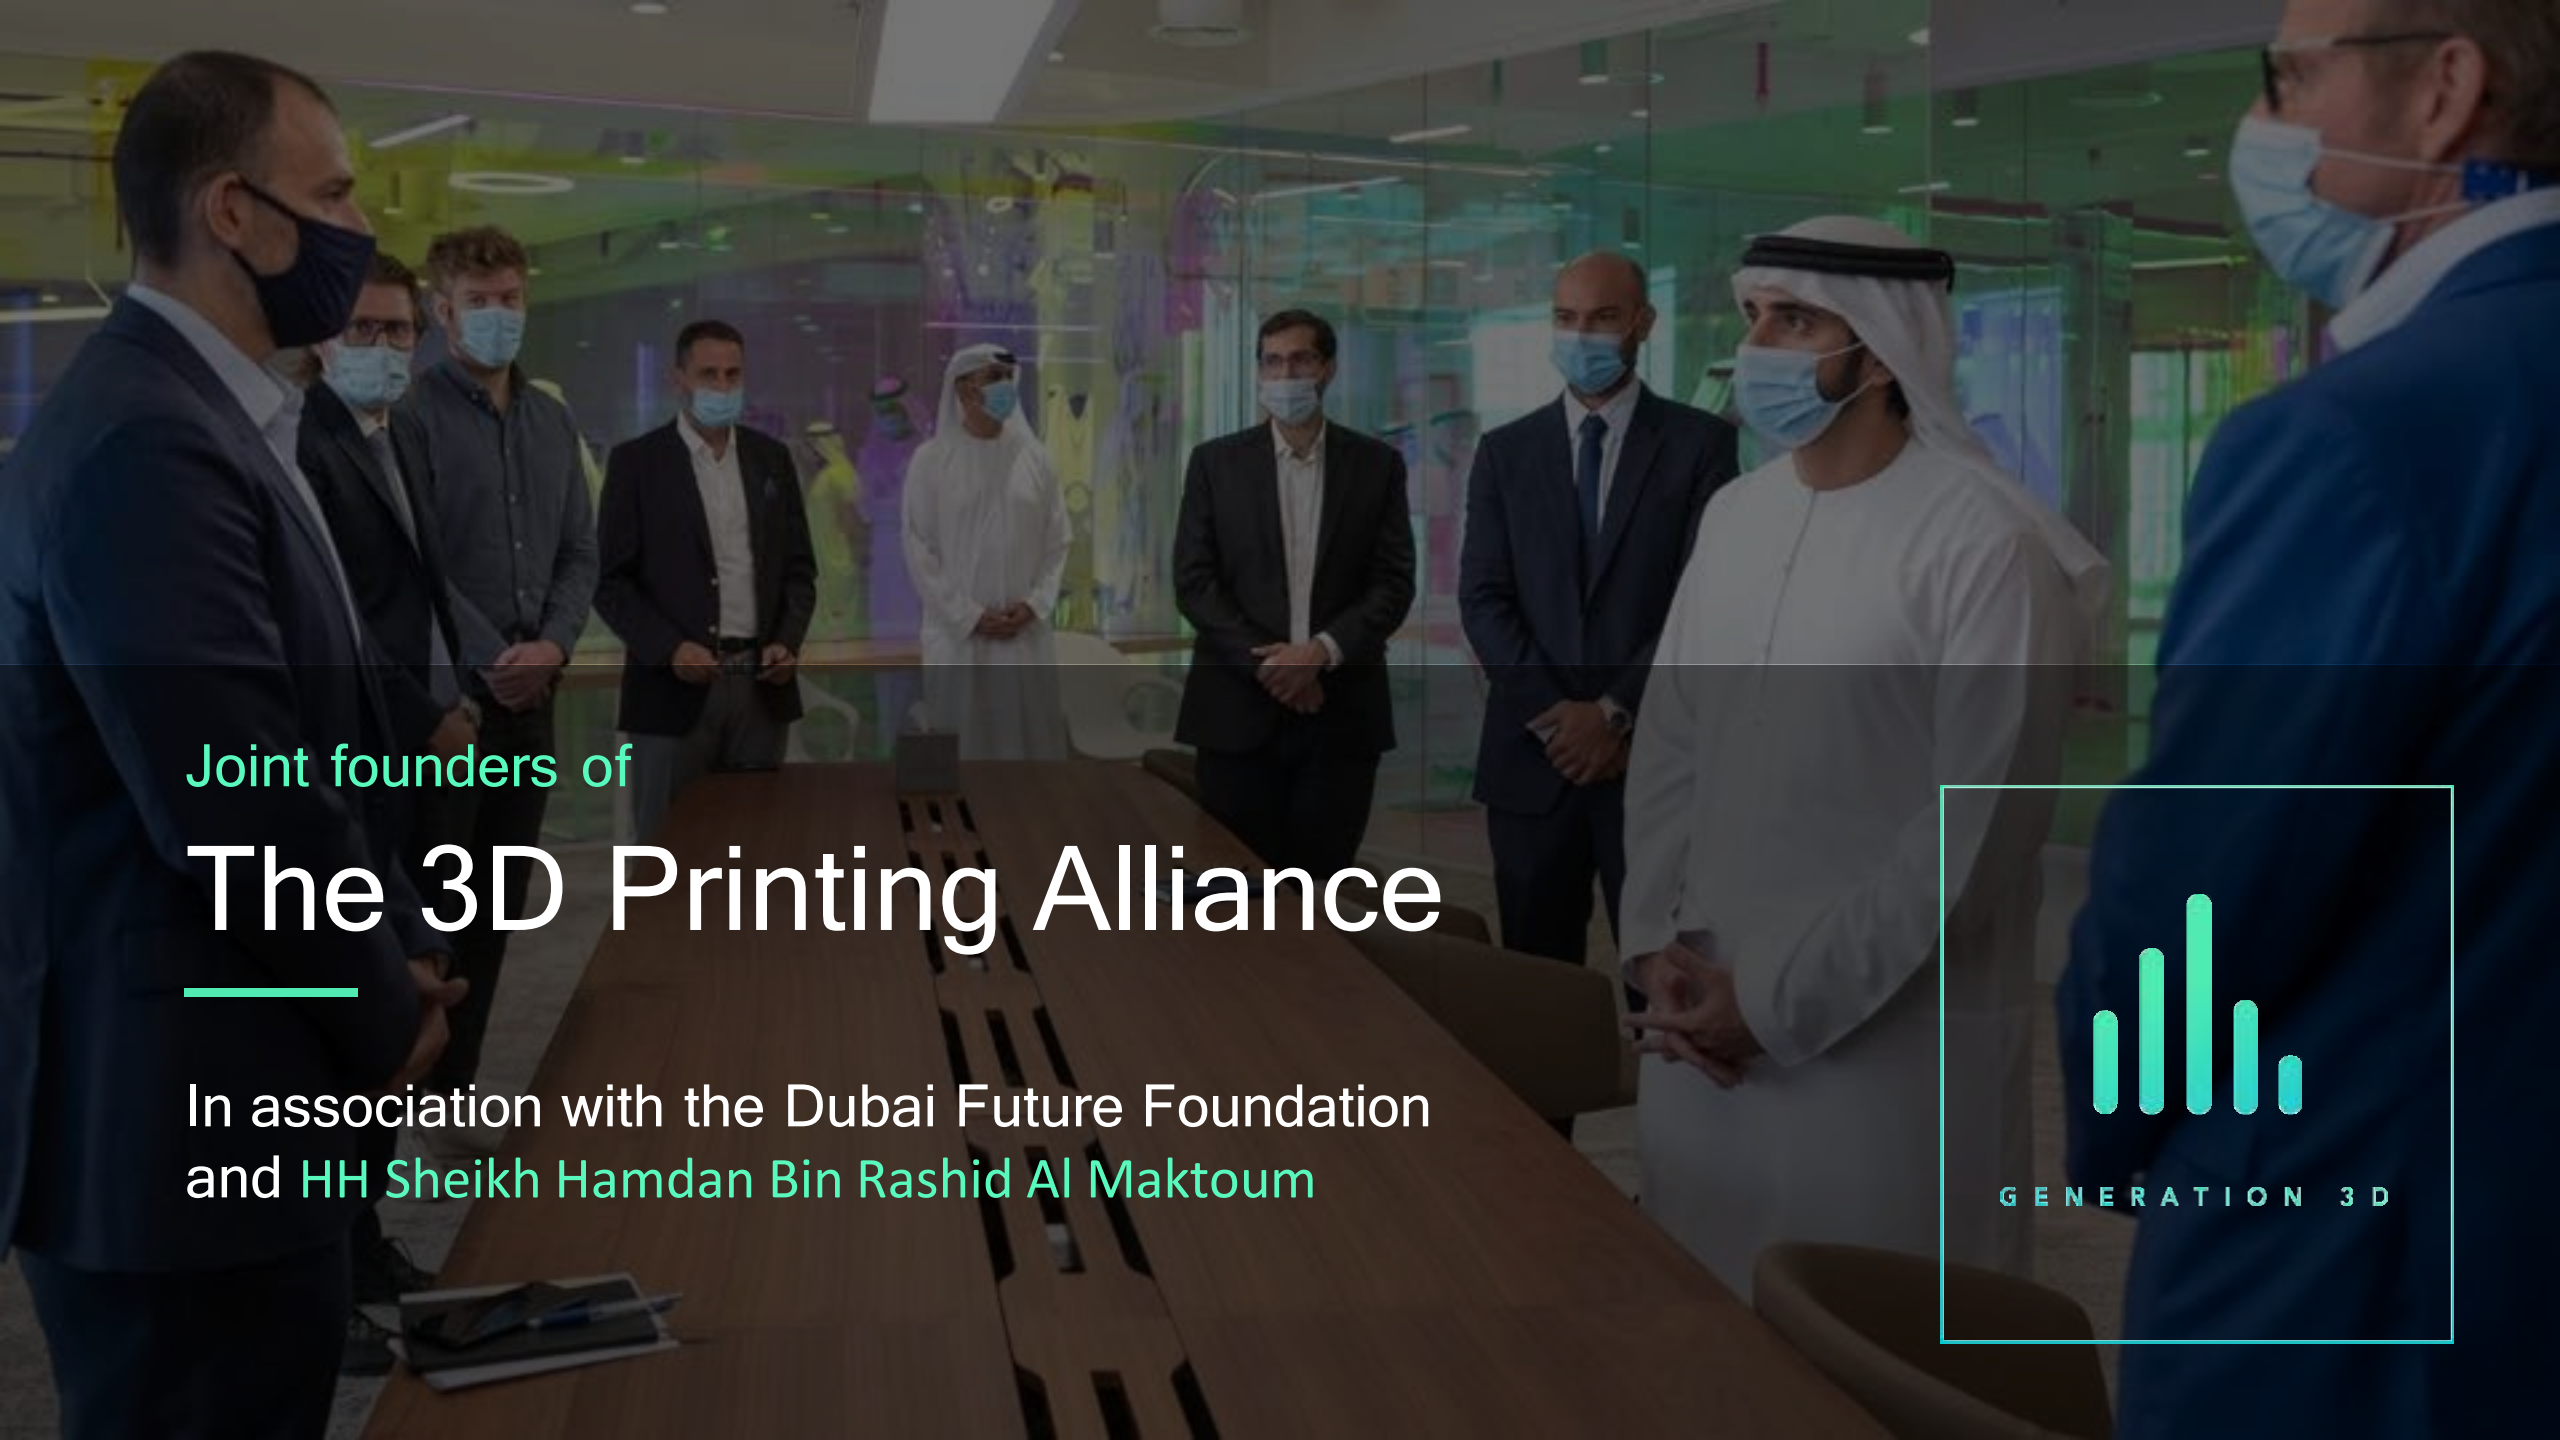

Welcome to #TeamG3D

No job too big, no job too small.

With 12+ years experience in 3D printing and 9+ years experience in the UAE, Generations 3D have a wide range of resources and capabilities to handle any technical project & installation.

We adopt a wide range of innovative and conventional manufacturing techniques to meet the most efficient budget and project requirements handling the entire process from A-Z.

Joint founders of

The 3D Printing Alliance

In association with the Dubai Future Foundation
and HH Sheikh Hamdan Bin Rashid Al Maktoum

GENERATION 3D

Our Process

Closed loop service

01

Understand

Seek to understand the full nature of a project and all of it's working elements and themes.

02

Ideate & Refine

With full client inclusivity develop and ideate a range of unique ideas and packages.

03

3D Print & Manufacture

Realise your custom designs through our innovative & automated 3D printing systems.

04

Focus on the Journey

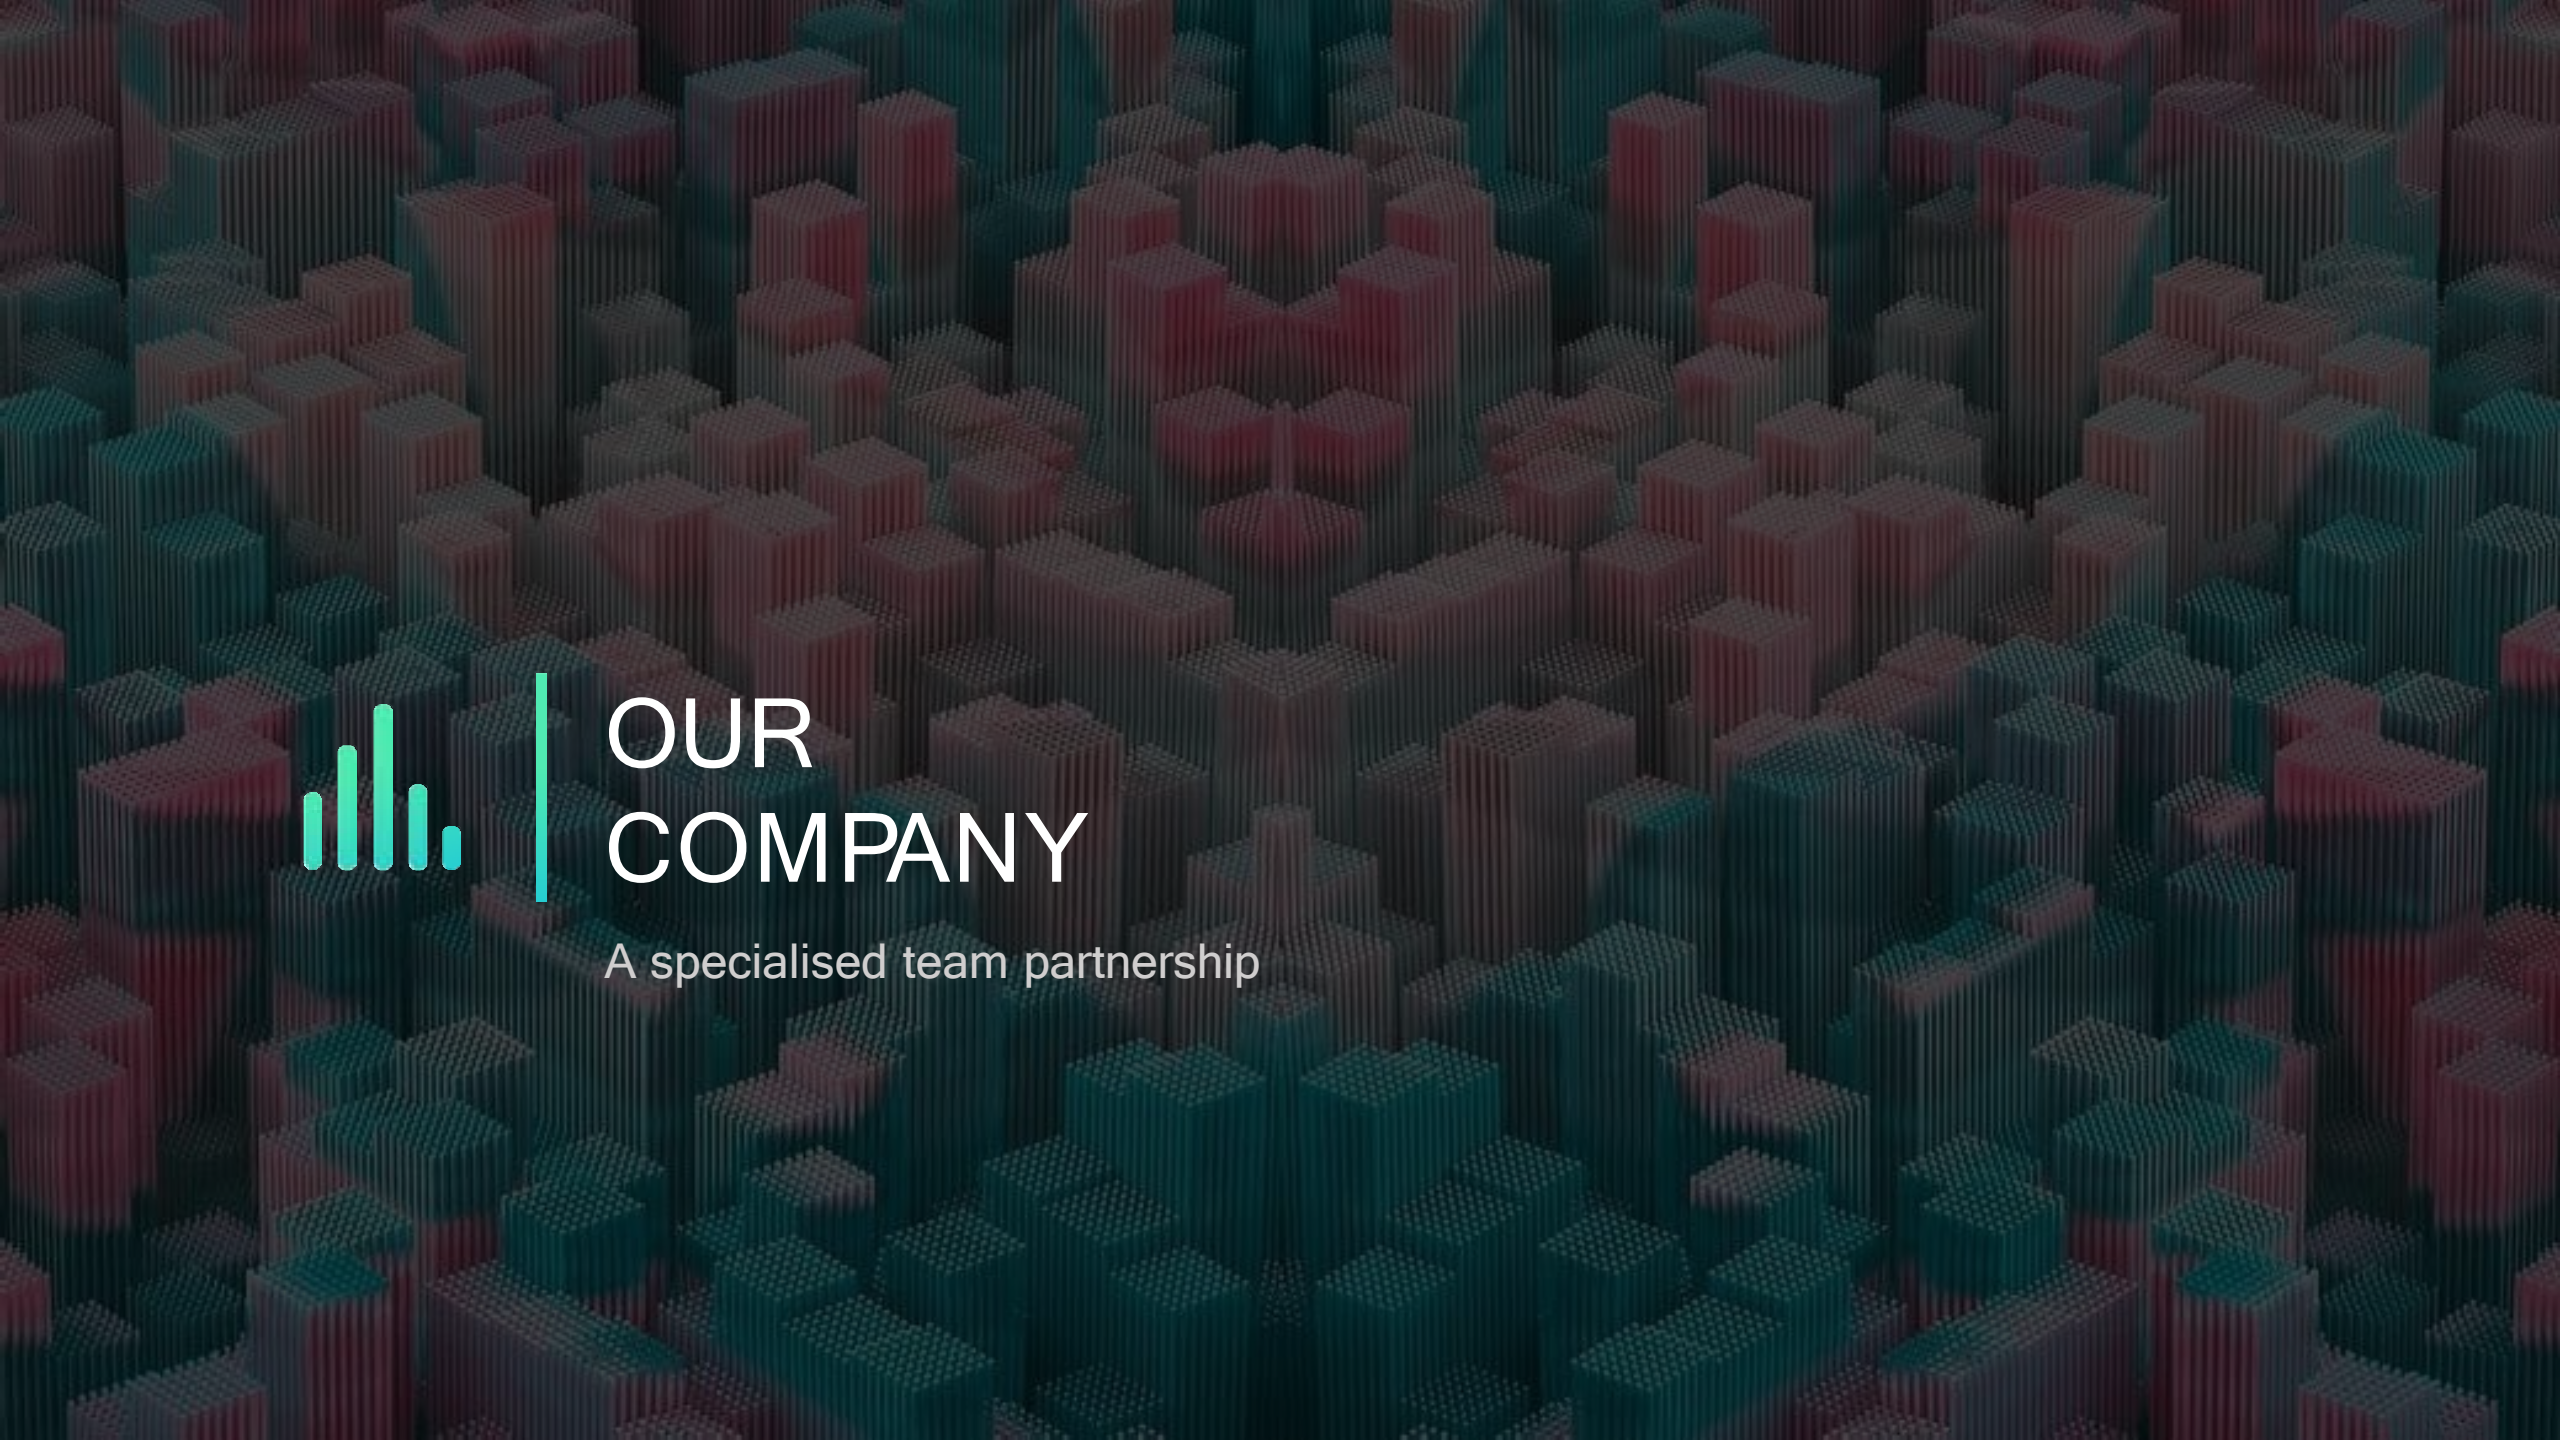

Engage our audience using the latest highly immersive tech and user focused experiences.

05

Deliver the Experience

Execute our work with precision and quality management, adaptation and feedback loops to create the ultimate composition of work.

OUR COMPANY

A specialised team partnership

Our Directors

20 years combined experience

Dominic Wright

Founding Partner
Business Development Head

10 years experience in business development, sales & strategy with an international band width.

Dominic graduated from Sussex University UK with a degree in International Business Management and has deep rooted connections within the fabric of the UAE tech industry.

Max Reynard

Founding Partner
Head of Operations

10 years experience in 3D printing & design in the UK & UAE.

With a BSc in Industrial Design Engineering and formerly contracted by various Formula One teams including Mercedes F1 Team, Max has a high degree of knowledge and experience in 3D printing & operations.

Our Chairman

With an enduring 45+ year career in the Motorsport & High performance engineering industry our Chairman, Adrian is as experienced as they come.

Breaking world records at the age of 20 and forming the worlds largest race car manufacturer [Reynard Racing Cars] Adrian achievements are truly remarkable.

At the height of Adrian's career the BAR Honda F1 team was formed under his operational leadership culminating in a championship winning car after handing over the team to Brawn GP.

Dr. Adrian Reynard

Motorsport Pioneer

Dr. Reynard holds two prestigious *Queens Awards for Export Achievement* and his own *Advance Motorsport Achievement Award* program undertaken by the UK's leading engineering institutions.

Adrian continues to consult & collaborate to this day.

Our Clients

Our clients are at the heart of what we do. We have methodically targeted the largest and most influential companies in each space to work with.

Keeping our ear to the ground and aware of our client's markets is key to us partnering with other growing partners.

Timeline

Here’s how the project will pan out.

Generation 3D will ensure deadline and milestone continuity based on receiving the prescribed documentation and datasets from the client.

The client therefore plays a very important role in the continuity of our premium service through key stages and approvals and should respond in a timely manner.

The client can speed up the project by:

- LPO & Down payment
- Sending approved CAD data / renders
- Ensuring speedy approvals of our samples
- Final payments

Benefits

Why clients chose Generation 3D over our competitors and move from traditional manufacturers.

We win business on a number of factors that make our service unique. Below are some of the key reasons

01

Design capability - The knowledge and intelligence begins with design. We have some of the best designers in the region and our own catalogue of files that we believe is unrivaled globally.

02

Technology selection - We understand the market here and what the market wants. We have a range of technology and material options that deliver on market expectations.

03

Reaction and production time - Due to our workflow and machinery, we are able to begin work and start producing in shorter lead times than traditional manufacturers .

04

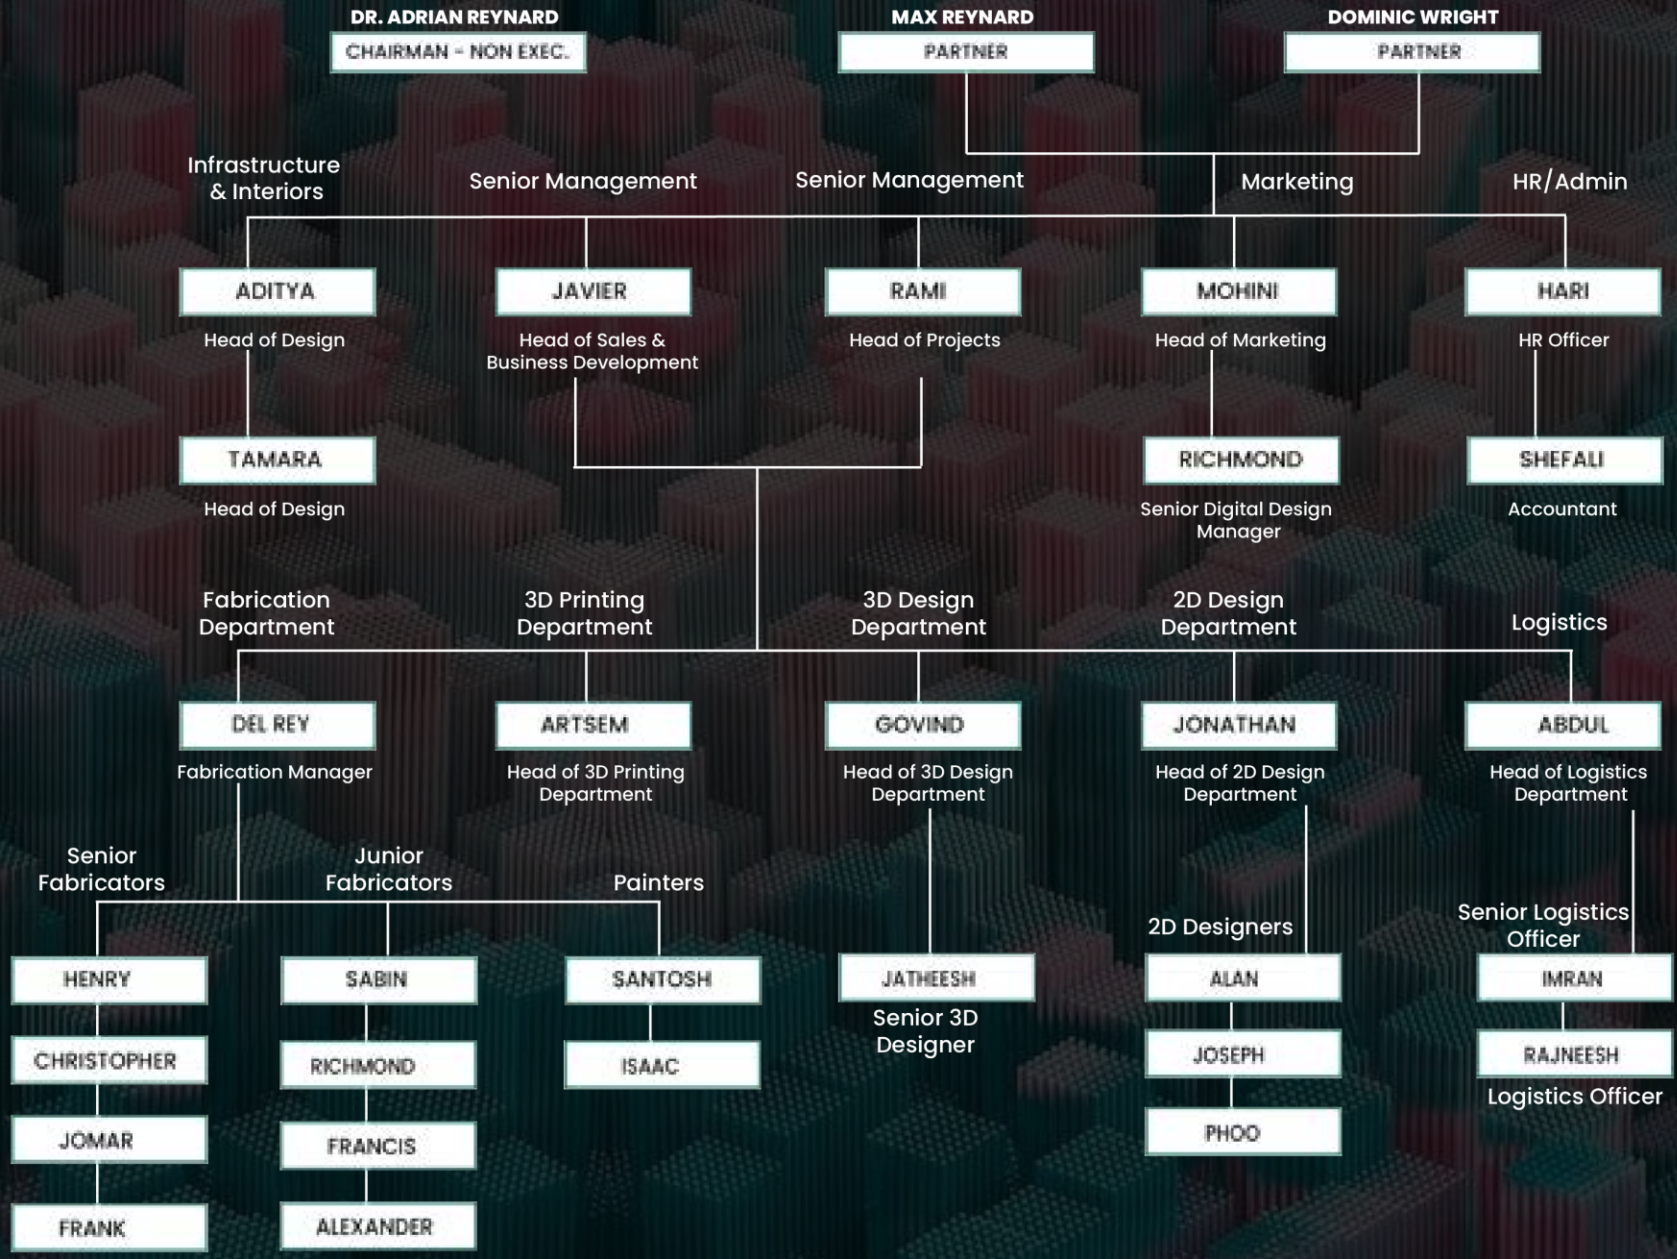

Quality of output - The way parts are processed and finished varies massively in the industry. Our product output is considered the most premium in the region.

05

“The real quality of a project is determined before and after printing”
